

**Introduction.**

More space in Visual Builder-Redwood table component and scroll horizontally.

When we create a table with many fields using a Welcome Page Template, by default, we can get a page like this:

VB\_REDWOOD\_COOKBOOK\_2025  
VB\_REDWOOD\_COOKBOOK\_2025  
VB\_REDWOOD\_COOKBOOK\_2025

lastName	firstName	email	commissionPct	department	createdBy	creationDate	hireDate

Notice that to see the fields on the right we must scroll the browser.

It is not a user-friendly option.

Also, our users would like to have more room to show the fields as this Redwood template by default do not use the left and right space as shown.

**Our tips.**

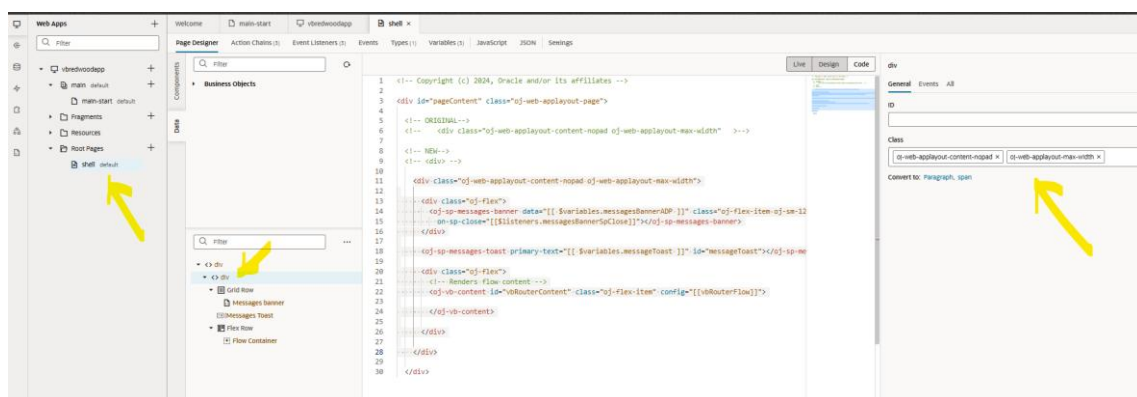

DISCLAIMER: this demo is for investigation, use at your discretion, no guarantee provided.

1) For scrolling horizontally, the table we can use this piece of code:

`style="height:400px; width: 100%" class="oj-table-stretch oj-flex-item"`

2) To have the right and left space available for the user we can remove the classes from the shell page as shown.

Result would be as shown:
