Renaming labels in Redwood pages.

VB_REDWOOD_COOKBOOK_2026.

Introduction.

In the Redwood world some features are available easily, others are more difficult, and others are a bit hidden.

I saw a few weeks ago some question in forums regarding how to change labels in Redwood pages, I was quite busy at the time and did not follow reading.

By chance, recently I was reviewing a PDF document related to Redwood customizations and found how to easily rename labels.

This demo shows how to rename labels in a Redwood page with "User Interface Text" tool.

This is the result of the demo that I want to share this week.

This is not pure Redwood stuff, but is quite useful to know it to deal with user requirements related to Redwood pages.

Create a Sandbox in Oracle ERP cloud.

Select "User Interface Text".

Sandboxes ⓘ ⟲

🗔 Search and Replace

Test your search term and replace term.

We will use a small change and revert back when finishes the demonstration.

We will use this page for our testing.

After entering the tool when we press the "Search" button.

Results would be as follows.

Jser Interface Text ⑦

Page [13] of 13 (121-127 of 127 items) |⟨ ⟨ 1 … 9 10 11 12 [13] ⟩ ⟩|

Lets narrow the search with these options.

	Find	Manufacturer
	Replace	Manufacturer_
		☑ Match Case
		☑ Match Complete Word or Phrase
	Language	American English ▾
	Type	☑ User Interface Text
		☐ Global Menu Label Text
		☐ Multipart Validation Messages
		☐ Enterprise Scheduler Text

Much better for our test.
